

Thank you for purchasing SOS for Business!

Deploying SOS for Business in your company is easy. Soon you'll be deploying, monitoring, and reporting on backups for employees and servers all across your organization.

Step One: Log in to the Dashboard

Log in to the Dashboard at

<http://dashboard.sosonlinebackup.com>

Step Two: Create your first backup account

- ✓ In the tools section of the Dashboard, click on "create account"
- ✓ Enter all applicable information for your account.
- ✓ Choose the proper GB storage plan for the machine on which you're installing the software.

Step Three: Download the Software

1. Choose the right software for the right machine
 - **For PCs:** choose Online Backup & Recovery Manager
 - **For Macs:** choose Online Backup for Mac
2. For installation across large networks, download the MSI and have your network administrator write an MST for mass deployment.
3. Login with the account you created for that machine.

The screenshot shows a web form titled "Create Backup Account". The form contains the following fields and options:

- Full Name: Text input field
- Email: Text input field
- Username (usually same as email): Text input field
- Password: Text input field
- Confirm Password: Text input field
- Is Ultrasafe: Checkbox with a question mark icon
- Secret Question: Dropdown menu with "What is your mother's maiden name?" selected
- Secret Answer: Text input field
- Size: Dropdown menu with "1 MB, Monthly" selected
- Assign ServerSave License: Checkbox
- Buttons: "Create" and "Clear" buttons at the bottom right.
